This Key Information Memorandum (KIM) sets forth the information, which a prospective investor ought to know before investing. For further details of the scheme/Mutual Fund, due diligence certificate by the AMC, Key Personnel, investors' rights & services, risk factors, penalties & pending litigations, associate transactions etc. investors should, before investment, refer to the Offer Document available free of cost at any of the Investor Service Centres or distributors or from the website www.quantmutual.com

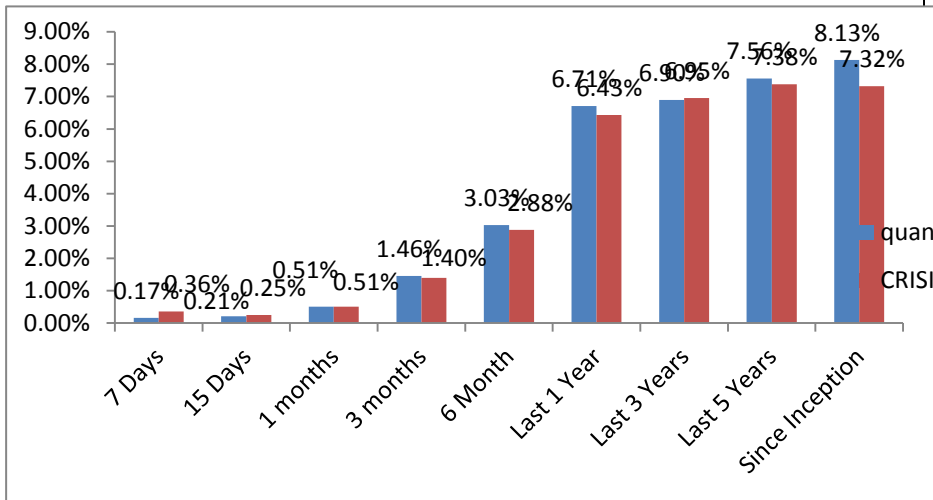

The Scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations 1996, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the accuracy or adequacy of this KIM.

This Key Information Memorandum is dated June 30, 2020.

Investment Objective	The investment objective of the scheme is to generate income through a portfolio comprising money market and debt instruments. There is no assurance that the investment objective of the Scheme will be realized.		
Asset Allocation Pattern of the scheme	Under normal circumstances, it is anticipated that the asset allocation shall be as follows:		
	Asset Class Allocation	Normal Allocation (% of net assets)	Risk Profile
	Debt and money market instruments (with maturity up to 91 days)	0-100%	Low
	The cumulative gross exposure through debt securities, money market securities/instruments and derivatives will not exceed 100% of the net assets of the Scheme. The Scheme may invest upto a maximum of 50% of total assets in foreign debt securities / instruments. Trading in Derivatives: To optimally manage portfolio risk, the Scheme may use various derivative instruments and hedging products in a manner permitted by SEBI. The scheme may take exposure to derivative instruments up to 100% of net assets.		
Investment Strategy of the Scheme	The Scheme shall invest in debt and money market instruments with residual maturity not exceeding 91 days, subject to regulatory changes from time to time. The Scheme shall endeavor to minimize credit risk and develop a well-diversified portfolio of debt (including securitized debt) and other instruments. Though every endeavor will be made to achieve the objective of the Scheme, the AMC / Sponsors / Trustee do not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme.		
Risk Profile of the Scheme	Mutual Fund investments are subject to market risks. Please read the SID carefully for details on risk factors before investment. Scheme specific risk factors are summarized below: Credit Risk: Debt instruments carry a Credit Risk, which essentially implies a failure on the part of the issuer of the security to honour its principal or interest repayment obligations. This inability of a credit issuer to honour its obligation is generally a function of underlying performance of the asset, in terms of generating the requisite cashflows. Credit risks of debt securities are rated by independent rating agencies. These ratings range from 'AAA' (read as 'Triple A' denoting 'Highest Safety') to 'D' (denoting 'Default'), with intermediate ratings between the two extremes. Deteriorating credit profile of an issuer may lead to a rating agency lowering the rating on its debt instruments; this is likely to lead to a fall in the price of these instruments. Liquidity Risk: Liquidity risk for debt instruments refers to the possibility that there might not be a ready buyer for the debt instrument at a time when the scheme decides to sell it. Liquidity risk is generally a function of the issuer (government securities are generally more liquid than corporate bonds), ratings (higher rated instruments are generally more liquid), and tenure (near tenure instruments are generally more liquid).		

	<p>Interest-Rate Risk: In case of fixed income bearing debt instruments, when interest rates rise, prices of the securities decline and when interest rates fall, the prices increase. The extent of sensitivity of a security to movement in interest rates is determined by its duration, which is a function of the existing coupon, the payment-frequency of such coupon, and days to maturity. Floating rate securities, with coupon linked to market interest rates have less sensitivity to interest rate risk.</p> <p>Prepayment Risk: Certain fixed income instruments come with a 'call option' which give the issuer the right to redeem the security through prepayment before the maturity date. This option is generally exercised in periods of declining interest rates, and will result in the scheme having to reinvest the proceeds of prepayment at lower yields, resulting in lower interest income.</p>	
Risk Mitigation	<u>Risk & Description specific to Debt</u>	<u>Risk Mitigants/ Management Strategy</u>
	<u>Credit Risk</u>	This risk shall be mitigated by investing in papers which have a high degree of safety. Further this risk is minimal in case of securities issued by central / state government/.
	<u>Liquidity Risk</u>	This risk shall be mitigated by striving to avoid investing in thinly traded securities or securities with lower volumes.
	<u>Interest-Rate Risk</u>	This risk can be mitigated by the fund manager striving to maintain portfolio duration which is appropriate for market conditions.
	<u>Prepayment Risk</u>	This risk can be mitigated by minimizing investments in securities with 'call options', unless favourable market conditions makes investments in such securities attractive.

- The half yearly consolidated account statement will be sent by e-mail to the Unit holders whose email address is registered with the Fund, unless a specific request is made to receive in physical.

Pursuant to SEBI circular SEBI/HO/IMD/DF2/CIR/P/2016/89 dated September 20, 2016, the following points have been incorporated to increase the transparency of information to the investors:

- (a) Each CAS issued to the investors shall also provide the total purchase value / cost of investment in each scheme.
- (b) Further, CAS issued for the half-year (ended September/ March) shall also provide:
 - (i) The amount of actual commission paid by AMCs/Mutual Funds (MFs) to distributors (in absolute terms) during the half-year period against the concerned investor's total investments in each MF scheme. The term 'commission' here refers to all direct monetary payments and other payments made in the form of gifts / rewards, trips, event

	<p>sponsorships etc. by AMCs / MFs to distributors. Further, a mention may be made in such CAS indicating that the commission disclosed is gross commission and does not exclude costs incurred by distributors such as service tax (wherever applicable, as per existing rates), operating expenses, etc.</p> <p>(ii) The scheme's average Total Expense Ratio (in percentage terms) for the half-year period for each scheme's applicable plan (regular or direct or both) where the concerned investor has actually invested in.</p> <p>(c) Such half-yearly CAS shall be issued to all MF investors, excluding those investors who do not have any holdings in MF schemes and where no commission against their investment has been paid to distributors, during the concerned half-year period. Any circular / clarification issued by SEBI in this regard will automatically become applicable and shall be incorporated in the SID/SAI/KIM wherever applicable.</p> <p>Applicable to Investors who opt to hold Units in Demat Form</p> <p>The AMC shall send an allotment confirmation specifying the units allotted by way of email and/or SMS within 5 Business Days of receipt of valid application/transaction to the Unit holders registered e-mail address and/or mobile number.
