Investment Strategy	<p>A 4-in-1 Approach</p> <p>To achieve the investment objective, SAMCO Multi Cap Fund will follow active investment strategy which employs a unique and balanced investment strategy designed to optimize returns across various market segments. The strategy is built around pre-dominantly equal weight across four key components – Large Caps, Mid-Caps, Small Caps and floating exposure to small caps/foreign securities/debt, ensuring diversified exposure to different market capitalizations.</p> <p>Allocation Strategy</p> <ol style="list-style-type: none"> 1. Large Caps (25% - 50% but pre-dominantly allocation shall be around 25%): <ul style="list-style-type: none"> • Market Cap Rank 1 – 100 • The fund shall at a strategic allocation level maintain minimum allocation of 25% to large caps. • Investment in large-cap stocks provides stability and liquidity to the portfolio. These companies are typically well-established with a proven track record, offering relatively lower risk compared to mid and small caps. 2. Mid Caps (25% - 50% but pre-dominantly allocation shall be around 25%): <ul style="list-style-type: none"> • Market Cap Rank 101 – 250 • The fund shall at a strategic allocation level maintain minimum allocation of 25% to mid caps. • Mid-cap stocks offer a balance between growth potential and stability. These companies are in the growth phase and have the potential to outperform large caps while maintaining a moderate risk level. 3. Small Caps Static Exposure (25% - 50% overall with 25% minimum static exposure on steady state strategic exposure): <ul style="list-style-type: none"> • The scheme will overall invest minimum 25% in small caps stocks however at an overall level, including floating exposure, the small cap exposure at a strategic level will be ~50%. • Small-cap stocks present higher growth opportunities due to their potential for significant expansion. However, they come with higher volatility and risk, which the fund mitigates through careful stock selection. • The number of stocks in this static exposure shall be between 15-20 stocks. 4. Floating Small Cap exposure for Final 25%: <ul style="list-style-type: none"> • At a strategic level, the final 25% shall also be allocated to small caps. However, this shall be subject to tactical changes as mentioned below. • These small caps shall be from larger undiscovered universe beyond NIFTY 500 to help the fund manager identify alpha opportunities. These smaller caps, though riskier, offer substantial growth potential. Investing in these stocks can result in high returns, driven by their lower market capitalization and the potential for rapid scaling.

	<p>Weights across market cap baskets shall be periodically re-balanced.</p> <p>Tactical Allocation strategy</p> <p>While the SAMCO Multi Cap Fund primarily adheres to a structured 4-in-1 investment strategy, allocating 25% each to large caps, mid-caps, small caps, and floating exposure for the balance 25%, it recognizes the necessity for flexibility in exceptional market conditions. In scenarios such as a bear market, the fund may exercise tactical deviations from its equal weight strategy to safeguard investor capital and optimize returns.</p> <p>Tactical Deviation in bear markets:</p> <p>1. Increased Allocation to Large Caps:</p> <ul style="list-style-type: none">○ During a bear market, large-cap stocks often provide a safer haven due to their stability, liquidity, and established market presence. The fund may allocate a substantial portion of its assets to large-cap stocks, deviating from the standard 25% allocation. This shift aims to mitigate risks associated with higher volatility and instability in mid and small cap stocks. <p>2. Hedging Strategies:</p> <ul style="list-style-type: none">○ In the absence of sufficient growth opportunities and to protect the portfolio from significant downturns, the fund may employ hedging strategies. These strategies can include derivatives, options, and futures to reduce net equity exposure and cushion the portfolio against adverse market movements. Hedging can effectively lower the portfolio's risk profile and preserve capital during turbulent times. <p>3. Investment in Debt or Money Market Instruments:</p> <ul style="list-style-type: none">○ To further manage risk and ensure liquidity during bear markets, the fund may invest in debt or money market instruments. These investments provide a stable and secure alternative to equities, offering predictable returns and lower volatility. By allocating assets to debt or money market instruments, the fund can maintain a conservative stance, preserving capital and reducing exposure to market fluctuations. <p>Flexibility in Asset Allocation</p> <p>The fund's tactical flexibility allows it to navigate through challenging market environments by dynamically adjusting its asset allocation. This proactive approach ensures that the portfolio remains resilient and capable of capitalizing on emerging opportunities while minimizing downside risks.</p> <p>Risk Management</p> <p>The flexibility to deviate from the equal weight strategy and the use of hedging mechanisms underscore the fund's commitment to robust risk management. By dynamically adjusting to market conditions, the fund aims to protect investor capital and enhance long-term returns, ensuring that the portfolio remains aligned with its investment objectives even in adverse market scenarios.</p>

<p>Stock Selection Criteria</p> <p>The SAMCO Multi Cap Fund employs a proprietary stock selection algorithm focused on identifying stocks demonstrating trending price action and earnings momentum. This methodology categorizes stock movements into four phases:</p> <p>1. Accumulation:</p> <ul style="list-style-type: none"> ○ Stocks have formed their lows and are now being acquired gradually over a period of time, typically before an uptrend. Fundamentals are starting to stabilize and ripe for overall growth. <p>2. Up Trending:</p> <ul style="list-style-type: none"> ○ Stocks showing a consistent upward price movement, indicating strong market confidence and momentum. Companies are growing revenues and profits; margins are expanding and valuation rerating is under process. The fund primarily focuses on these stocks for their potential high returns. <p>3. Consolidation:</p> <ul style="list-style-type: none"> ○ Stocks experiencing a temporary pause in their price movement, typically following a significant uptrend. Prices might have raced ahead of fundamentals and therefore the stock price is undergoing consolidation, but the underlying growth engine is still intact. These stocks are still considered for the portfolio for their potential to resume and upward trend. <p>4. Down Trending:</p> <ul style="list-style-type: none"> ○ Stocks experiencing a downward price movement. The fundamentals are deteriorating revenues and profits are stagnating or declining. The fund avoids stocks in this phase to minimize risk. <p>Portfolio Construction</p> <p>The portfolio is predominantly constructed from stocks in the uptrend phase, leveraging their positive momentum to drive returns. A few stocks may also be included from the accumulation and consolidation phases, based on their potential to transition into uptrends. The careful and dynamic stock selection process ensures the fund captures growth opportunities across different market capitalizations while managing risk effectively.</p> <p>By combining these elements, the SAMCO Multi Cap Fund aims to deliver superior risk-adjusted returns, making it a compelling choice for investors seeking diversified exposure to the Indian equity market.</p> <p>For detailed derivative strategies, please refer to SAI.</p> <p>Portfolio Turnover Policy</p> <p>The Scheme is an open-ended scheme. It is expected that there would be a number of subscriptions and redemptions on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.</p>

	<p>There may be an increase in transaction cost such as brokerage paid, if trading is done frequently. However, the cost would be negligible as compared to the total expenses of the Scheme. Frequent trading may increase the profits which will offset the increase in costs. The fund manager will endeavor to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. However, it is difficult to estimate with reasonable accuracy, the likely turnover in the portfolio of the Scheme. The Scheme has no specific target relating to portfolio turnover.</p>
Risk profile of the scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.</p> <p>Scheme specific Risk Factors are summarized below:</p> <p>Different types of securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the Scheme's risk may increase or decrease depending upon its investment pattern.</p> <p>Risks associated with investments in Equity and Equity related instruments:</p> <p>Investments in equity and equity related securities involve a degree of risk and investors should not invest in equity schemes unless they afford to take the risk of losing their investment. Equity instruments by nature are volatile and prone to price fluctuations on a daily basis due to both micro and macro factors. Volatility in the capital markets, changes in policies of the Government, taxation laws or any other political and economic development may negatively affect the prices of the securities invested in by the Scheme. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of some of the investments. The Scheme may inter-alia also be exposed to the risk arising from over exposure to few securities/issuers/sectors.</p> <p>Risks associated with Derivatives</p> <p>The Scheme may invest in derivative products in accordance with and to the extent permitted under the Regulations. The use of derivatives requires an understanding of the underlying instruments and the derivatives themselves. The risk of investments in derivatives includes mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.</p> <p>Risk Associated with covered call strategy</p> <p>The Scheme may write covered call option only in case it has adequate number of underlying equity shares as per regulatory requirement. This would lead to setting aside a portion of investment in underlying equity shares. If covered call options are sold to the maximum extent allowed by regulatory authority, the Scheme may not be able to sell the underlying equity shares immediately if the view changes to sell and exit the stock. The covered call options need to be unwound before the stock positions can be liquidated. This may lead to a loss of opportunity, or can cause exit issues if the strike price at which the call option contracts have been written become illiquid. Hence, the Scheme may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity.</p>

Risks associated with investments in Fixed Income Securities:

The NAV of the Scheme, to the extent invested in fixed income securities, will be affected by changes in the interest rates due to various factors such as government borrowing, inflation, economic performance etc. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates. Investments in Fixed Income securities may inter-alia carry Re-investment Risk, Spread Risk, Credit/Default Risk, Liquidity Risk, Prepayment Risk, etc.

Risk associated with investing in Foreign Securities

Subject to necessary regulatory approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances. It is AMC's belief that investment in foreign securities offer new investment and portfolio diversification opportunities into multi-market and multicurrency products. However, such investments also entail additional risks. Such investment opportunities may be pursued by AMC provided they are considered appropriate in terms of the overall investment objectives of the Scheme. Since the Scheme may invest only partially in foreign securities, there may not be readily available and widely accepted benchmarks to measure performance of the Scheme.

Risks associated with Short Selling & Securities Lending

Securities Lending is a lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.

Short-selling is the sale of shares or securities that the seller does not own at the time of trading. Instead, he borrows it from someone who already owns it. Later, the short seller buys back the stock/security he shorted and returns the stock/security to the lender to close out the loan. The inherent risks are Counterparty risk and liquidity risk of the stock/security being borrowed. The security being short sold might be illiquid or become illiquid and covering of the security might occur at a much higher price level than anticipated, leading to losses.

Risks associated with Investing in Structured Obligation (SO) & Credit Enhancement (CE) rated securities

Credit rating agencies assign CE rating to an instrument based on any identifiable credit enhancement for the debt instrument issued by an issuer. The credit enhancement could be in various forms and could include guarantee, shortfall undertaking, letter of comfort, etc. from another entity. This entity could be either related or non-related to the issuer like a bank, financial institution, etc. Credit enhancement could include additional security in form of pledge of shares listed on stock exchanges, etc. SO transactions are asset backed/ mortgage backed securities, securitized paper backed by hypothecation of car loan receivables, securities backed by trade receivables, credit card receivables etc. Hence, for CE rated instruments

	<p>evaluation of the credit enhancement provider, as well as the issuer is undertaken to determine the issuer rating. In case of SO rated issuer, the underlying loan pools or securitization, etc. is assessed to arrive at rating for the issuer.</p> <p>Risks associated with investing in Securities Segment and Tri-party Repo trade settlement</p> <p>The mutual fund is exposed to the extent of its contribution to the default fund of CCIL at any given point in time i.e. in the event that the default waterfall is triggered and the contribution of the mutual fund is called upon to absorb settlement/default losses of another member by CCIL, the scheme may lose an amount equivalent to its contribution to the default fund.</p> <p>Risks associated with transaction in Units through stock exchange(s):</p> <p>In respect of transaction in Units of the Scheme through Bombay Stock Exchange ("BSE") and / or National Stock Exchange ("NSE"), allotment and redemption of Units on any Business Day will depend upon the order processing / settlement by NSE and / or BSE and their respective clearing corporations on which the Fund has no control.</p> <p>Risks associated with Restrictions on Redemption:</p> <p>The Trustee and the AMC may impose restrictions on redemptions when there are circumstances leading to a systemic crisis or event that severely constricts market liquidity or the efficient functioning of markets. Accordingly, such restrictions may affect the liquidity of the Scheme and there may be a delay in investors receiving part of their redemption proceeds.</p> <p>Risks associated with Segregated portfolio:</p> <p>The AMC / Trustee shall decide on creation of segregated portfolio of the Scheme in case of a credit event at issuer level i.e. downgrade in credit rating by a Credit Rating Agencies (CRA) or actual default of either the interest or principal amount, in case of its unrated debt or money market instruments. Accordingly, Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer. The Security comprises of segregated portfolio may not realise any value.</p> <p>Further, listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.</p> <p>For details on risk factors and risk mitigation measures, please refer SID.</p>
Plans and Options Plans/Options and sub options under the Scheme	<p>There will be two plans under the Scheme namely, Regular Plan and Direct Plan.</p> <ul style="list-style-type: none"> • Samco Multi Cap Fund – Regular Plan • Samco Multi Cap Fund – Direct Plan <p>Regular Plan: This Plan is for investors who wish to route their investment through any distributor.</p>

The Fund shall upload the details of the investors on the system of the KYC Registration Agency ("KRA"). The Registrar & Transfer Agent of the Fund viz. On receipt of the KYC documents from the Fund, the KRA shall send a letter to the investor within SEBI stipulated timelines, confirming the details thereof.

- Once the investor has done KYC with a SEBI registered intermediary, the investor need not undergo the same process again with another intermediary but can submit the letter/acknowledgment issued by the KRA.

Samco Asset Management Private Limited and NISM/AMFI certified distributors who are Know Your Distributor (KYD) compliant are authorized to undertake the IPV for mutual fund investors. All categories of investors except individuals, company listed on a stock exchange or majority owned subsidiary of such company, are requested to provide details about beneficial ownership in the Application Forms for all their investments. XV. FATCA DETAILS:

The Foreign Account Tax Compliance Act is a United States (US) federal law, aimed at prevention of tax evasion by US Citizens and Residents ("US Persons") through use of offshore accounts. The FATCA provisions were included in the HIRE Act enacted by the US legislature. FATCA is designed to increase compliance by US taxpayers and is intended to bolster efforts to prevent tax evasion by the US taxpayers with offshore investments.

As per SEBI circular no. CIR/MIRSD/2/2014 dated June 30, 2014, the Government of India and the US have reached an agreement in substance on the terms of an Inter-Governmental Agreement ("IGA") to implement the FATCA provisions, which have become globally applicable from July 1, 2014. FATCA requires enhancement of due diligence processes by the Foreign Financial Institutions ("FFI") so as to enable identification of US reportable accounts.

The Fund/ Asset Management Company ("the AMC") are likely to be classified as a FFI under the FATCA provisions in which case the Fund /the AMC would be required, from time to time, to (i) undertake necessary due diligence process by collecting information/ documentary evidence of the US/non US status of the investors; (ii) disclose/ report information as far as may be legally permitted about the holdings/investment returns pertaining to reportable accounts to the US Internal Revenue Service and/or such Indian authorities as may be specified under FATCA or other applicable laws and (iii) carry out such other activities as prescribed under the FATCA provisions, as amended from time to time.

FATCA due diligence will have to be directed at each investor/unit holder (including joint investors) and on being identified as a reportable person/specify US person, all the folios will be reported. Further, in case of folio with joint investors, the entire account value of investment portfolio will be attributable under each such reportable person. Investors/Unit holders would therefore be required to furnish such information to the Fund/AMC, from time to time, in order to comply with the reporting requirements stated in the IGA and or circulars/ guidelines issued by SEBI/AMFI in this regard.

The impact of FATCA is relevant not only at the point of on-boarding of the investors but also throughout the life cycle of the investor account / folio with the Fund. Hence investor(s) should immediately intimate the Fund/AMC, in case of any change in the FATCA related information provided by them at the time of initial subscription.

The Fund/AMC reserves the right to reject any application or compulsorily redeem the units held directly or beneficially in case the applicant/investor fails to furnish the relevant information and/or documentation or is found to be holding units in contravention of the FATCA provisions.

Investors are advised to consult their tax advisors to understand the FATCA requirements and its implications in relation to their investment.

XVI. CENTRAL KYC RECORDS REGISTRY (CKYCR):

The Government of India vide their Notification dated November 26, 2015 authorised the Central Registry of Securitisation Asset Reconstruction and Security Interest of India ('CERSAI') to act as and to perform the functions of the Central KYC Records Registry under the said rules, including receiving, storing, safeguarding and retrieving the KYC records under the Prevention of Money Laundering Act, 2002. SEBI required all the market intermediaries to update/upload KYC details of the new customer/investors (not KYC-KRA compliant) on CERSAI's online platform. CERSAI is a centralized repository of KYC records of customers/investors in the financial sector with uniform KYC norms and inter-usability of the KYC records across the sector with an objective to reduce the burden of producing KYC documents and getting those verified every time when the customer/investors creates a new relationship with a financial entity. Central KYC (CKYC) will store all the customer/investor information at one central server that is accessible to all the financial institutions. After opening a KYC account under the CKYC, customer/investor will get a 14-digit identification number ("KYC Number") and that the same may be quoted by the investor wanting to invest in mutual funds. Further, the Mutual Fund/AMC is required to check whether the PAN of the investor has been updated in CKYCR. In case the PAN has not been updated, the Mutual Fund/AMC shall collect a self certified copy of the investor's PAN card and update/upload the same in CKYCR. In case the Investor uses the old KRA KYC form for updating of any KYC information, such investor shall be required to provide additional/missing information only by using the supplementary CKYC form or fill the new "CKYC form".

XVII. DEMATERIALIZATION:

The unit holders would have an option to hold the units in dematerialized form. The applicant intending to hold units in dematerialized form will be required to have a beneficiary account with a Depository Participant (DP) of the NSDL/CDSL and will be required to mention in the application form DP ID, DP Name and Beneficiary Account No. with the DP name at the time of subscribing to the units of the Scheme. Applicants must ensure that the sequence of the names as mentioned in the application form matches with that of the beneficiary account held with the Depository Participant. Names, Address, PAN details, KYC Details etc. mentioned in the application form will be verified against the Depository data. If the details mentioned in the application (other than ASBA applications) are incomplete / incorrect or not matching with the depository records, the application shall be treated as application for nondemat mode and accordingly units will be allotted in non-demat mode. Note - In case of subscription of units through SIP in demat (electronic) mode, unit holder will not be able to redeem / transfer such units till units are credited to investor's Demat (Beneficiary) account.
