Subject to the Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. These proportions can vary substantially depending upon the perception of the AMC, the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and for defensive considerations only.

#### **Investment Strategy**

## **EQUITY INVESTMENT STRATEGY:**

The investment strategy of the fund will be based on the market capitalization of companies. The fundwill invest in stocks of large cap & midcap companies (paragraph 2.6 of SEBI Master Circular on Mutual Funds dated May 19, 2023) in accordance with the investment objective and asset allocation.

As per the said circular, large cap, mid cap and small cap are defined as

- a. Large Cap:1<sup>st</sup>-100<sup>th</sup>company in terms of full market capitalization;
- b. Mid Cap:101st-250th company in terms of full market capitalization;
- c. Small Cap:251stcompany onwards in terms of full market capitalization

The AMC shall adopt the list of stocks prepared by AMFI in this regard and AMFI would adhere to the following points while preparing the list:

- a. If a stock is listed on more than one recognized stock exchange, an average of full market capitalization of the stock on all such stock exchanges, will be computed;
- b. In case a stock is listed on only one of the recognized stock exchanges, the full market capitalization of that stock on such an exchange will be considered.;
- c. This list would be uploaded on the AMFI website and the same would be updated every six months based on the data as on the end of June and December of each year. The data shall be available on the AMFI website

- within 5 calendar days from the end of the 6 months period.
- d. Subsequent to any updation in the list, Mutual Fund shall rebalance its portfolios(if required)in line with updated list, within a period of one month.

A bottom-up fundamental approach will be used for identifying these stocks.

Stock identification process would include company and business analysis, industry analysis, future plans, projections, technical analysis and valuations. Based on analysis of various financial and non-financial parameters, the stocks will finally be shortlisted for portfolio construction process.

The Fund Manager of the scheme would also take cues from the global macroeconomic trends, Government policy and monetary policy actions to decide on the asset allocation. The allocations will be within the limits defined in the asset allocation table.

Apart from in-house research, external research is used as an important source of information. Various magazines, journals, newspapers and databases also help in the research process.

#### **Portfolio Construction**

The fund manager has the primary responsibility for portfolio construction based on the investment objective of the Scheme. Every investment decision taken is by keeping in mind the investment objective of the Scheme and how the security will affect the overall portfolio.

The Scheme will maintain a well-diversified portfolio focusing on a buy and hold strategy, at most times, as investments in these midcap companies need patience for the expected returns to fructify.

In addition, the current macro-economic / industry scenario is also monitored and analyzed to assess any impact on the sector and asset allocation decisions of the fund. Technical views which are relevant to assetallocation, if applicable will also be taken into consideration. The focus would be on long term investing driven by fundamental research. However, short-term performance will also be monitored and evaluated.

# **DEBT INVESTMENT STRATEGY:**

The Fund Manager would seek to provide risk adjusted returns by optimizing the tradeoffs between liquidity, duration (interest rate movement), and credit quality, depending on the macro- economic, technical, and market factors including future course of system liquidity, interest rates, and other fiscal and monetary variables.

The investment strategy starts from analysis, then incorporates limits, looks at portfolio construction and rebalancing, and finally performance monitoring as a feedback loop.

The analysis activity starts from macroeconomic analysis, including fiscal and economic factors, impactof global and local events on India's macroeconomy, and finally impact of these on the fixed income market. Technical analysis is undertaken as to the likely range of movement, and deciding the timing. Market activity analysis is looked into to determine liquidity of specific securities. Credit analysis and monitoring is resorted to, and dovetailed with the other analysis to determine credit quality, and ideal spreads where specific securities ought to be trading at. This is a continuous process. All this analysis is sieved through limit filters set by the investment committee.

Based on these results, portfolio construction and rebalancing is carried out. The performance of the portfolio is continuously monitored, and feedback is taken as to the performance of individual securities to test the assumptions behind the analysis. The assumptions are then tweaked from the learning incorporated by the feedback.

Based on this learning, fresh analysis is carried out for portfolio rebalancing, and the process continuously iterates.

## **Portfolio Turnover:**

The Scheme being an open-ended Scheme, it is expected that there would be a number of Subscriptions and Redemptions on a daily basis. Further, in the debt market, trading opportunities may arise due to changes in system liquidity, interest rate policy announced by RBI, shifts in the yield curve, credit rating changes or any other factors. In the opinion of the fund manager these opportunities can be played out to enhance the total return of the portfolio, which will result in increase in portfolio turnover. There may be an increase in transaction cost such as brokerage paid, if trading is done frequently. However, the cost would be negligible as compared to the total expenses of the Scheme. The fund manager will endeavor to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. However, it is difficult to estimate with reasonable measure accuracy, the likely turnover in the portfolio of the Scheme. The Scheme has no specific target relating to portfolio turnover.

# Risk Profile of the Scheme

Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:

Investments in equity and equity related instruments involve a degree of

risk, both company specific and market risks and thus investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.

Equity and Equity Related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as price volatility, volumes traded, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units issuedunder the Scheme may be adversely affected.

The scheme also carries risks associated with investing in debt and money market securities, derivatives. Investments in debt and money market instruments are subject to interest rate risk, re-investment risk, basis risk, credit risk, spread risk, prepayment risk, Segregated Portfolio etc.

For details on risk factors and risk mitigation measures, please refer SID.

- (c) Application form shall be modified to provide for demat account details and other details to enable exercise of the option as detailed above.
- Investors having MF investments and holding securities in Demat account shall receive a single Consolidated Account Statement (CAS) from the Depository.

For PANs which are common between depository and the AMC, the depository shall send the CAS. In other cases (i.e. PANs with no demat account and only MF units holding), the AMC/RTA shall continue to send the CAS to its unit holders as is being done presently in compliance with the Regulation 36(4) of the SEBI (Mutual Funds) Regulations.
- The CAS shall be generated on a monthly basis.
- If there is any transaction in any of the Demat accounts of the investor or in any of his mutual fund folios, depositories shall send the CAS within fifteen days from the month end. In case, there is no transaction in any of the mutual fund folios and demat accounts then CAS with holding details shall be sent to the investor on half yearly basis.

However, option shall be given to the demat account holder by the default depository to choose the depository through which the investor wishes to receive the CAS.
- Where statements are presently being dispatched by email either by the Mutual Funds or by the Depositories, CAS shall be sent through email. - If an investor does not wish to receive CAS, an option shall be given to the investor to indicate negative consent.

The dispatch of CAS by the depository would constitute compliance by the AMC/ the Fund with the requirement under Regulation 36(4) of SEBI (Mutual Funds) Regulations.
